

1. Open MATLAB
2. In MATLAB, open the folder nutrition-label-reader
3. Double click on gui.mlapp
4. Click run in the top right corner
5. Click the browse images button to select a JPG or PNG of a nutrition label or barcode
6. The image you have selected will appear in the GUI
7. Click scan label if the image is a label, or scan barcode if the image is a barcode
8. Wait for results
9. The processed image will replace the original image in the GUI, and nutrition data will appear in the text area
